PROFILE

I am an Industrial Designer specializing in product, spatial, and transportation design. My diverse interests fuel my interdisciplinary approach, blending unique perspectives into varied design styles. By incorporating experimental thinking, innovative ideas, and functional solutions, I create designs that resonate. My focus on understanding what makes things appealing and identifying real needs ensures my work is both desirable and impactful.

CORE STRENGTHS

Strategic Thinking & Research

- Strong reasoning and analytical skills, with a systems-oriented approach to design problems
- Skilled in reframing design challenges through user interviews, field research, and market analysis
- Capable of bridging design, business, and social perspectives to build forward-thinking solutions

Creative Development & Interdisciplinary Execution

- Experienced across product, spatial, CMF, and transportation design projects
- Fluent in CAD modeling, rendering, hand prototyping, and visual storytelling
- Comfortable shifting between physical and digital workflows to explore form, interaction, and narrative

Communication, Leadership & Cultural Fluency

- Trilingual: fluent in Mandarin and English, conversational in Japanese
- Strong presentation skills: able to articulate design value clearly to diverse audiences
- Proven team leadership in cross-cultural and multidisciplinary collaborations

INTERNSHIP EXPERIENCE

Industrial Design Intern — PHOENIX, Shanghai

May 2025 – Aug 2025

Supported the Product Design team in research, ideation, visualization, and prototyping across multiple product areas.

- Participated in client workshops, project planning, and team presentations.
- Recognized for reliability, enthusiasm, and strong collaboration within the design team.

Exhibitor

Healing Light, TUB (Roppongi Hills), Tokyo
